

free water

© Stephen Fisk SOCAN/2007

don't look for debt relief from hubris / 'cause if the naked truth be told
you can democratize, commercialize / you can globalize the old
you can terrorize and paralyze / but no one owns uncommon gold

human capital is one life / a single child among the poor
its a parity party of leveling / from our ceilings to their floors
we can subjugate or we can educate / we can trans-mutate our world
we can communicate or eradicate / the bottom line of soul

free water / its free water . . .

infrastructure won't equalize / if we don't distribute heart
no growth economies with HIV's / while the policy's of societies
driving SUV's are lacking art / prosperity is transparency
not these poverty traps of war

free water / its free water . . .

free water for all / its free water . . . free water
