

under cover of a shadow sky

© Stephen Fisk/SOCAN 2009

under cover of a shadow sky / wade into the silence of the water
surrender and redeem / wash this body clean / drown every ghost that screams
out for you ...

under cover of a shadow sky / under cover of a shadow sky

climb back up / ride on a wind horse breeze

under cover of a shadow sky / sun shines inside us free

under cover of a shadow sky / raise a face to greet the coming

child in every human heart / playing every lover's part

to reach you ...

climb back up / ride on a wind horse breeze

under cover of a shadow sky / sun shines inside us free

walk into the moment next to you / talking with the mouth I share with you

no blocking out the love that's coming through ... it's coming through

under cover of a shadow sky / wade into the silence of the water

surrender and redeem / wash this body clean / drown every ghost that screams
out for you ...
