summer heat / the airwaves buzz / there's no retreat / you effect my cause
the spark is wet / short circuit ground / skin crawls / naked sweat pouring down

elec tricity . . . elec tricity . . . e lec tricity . . . you and me elec tric . . .

collider paths / stop and go / weakened charge / you resist my flow
ignition wires / conduction bones / rain fall, signal fire, resistor zones
static cling / impedes my voice / you alternate / discharging choice
summer heat / connection gap / storm front, lightening flash, thunder clap

elec tricity . . . elec tricity . . . e lec tricity . . . you and me elec tric . . .

we're polar fields of equal doubt / no neutral force looking out
you're a solar wind / you blow through me . . . electricity . . .
